WE ARE
FEURER!
A BRAND INTRODUCES ITSELF.

> FEURER. Protecting Products.

FEBRA, KR-PORSIPLAST and PPO have joined together to become FEURER – a strong brand with a clear mission: to protect products from heat and cold, pressure and damage. To this aim, FEURER develops and produces intelligent solutions for packaging and packaging logistics. For example, thermoboxes which keep your food safe. Systems which make your logistics more efficient. As well as vehicle components which ensure your safety.

> Reusable with added value.
Industrial Packaging made by FEURER.

Whether sensitive headlights or complex interior trims for cars, fragile panes of glass or heavy engine components: FEURER develops and produces tailor-made transport containers for your processes.

- > And they work spot on.
FEURER Components made of EPP and EPS.

Sun visors and crash absorbers for cars, thermal insulation for heating systems, foamed or thermoformed transport protection – FEURER components offer practically unlimited application possibilities.

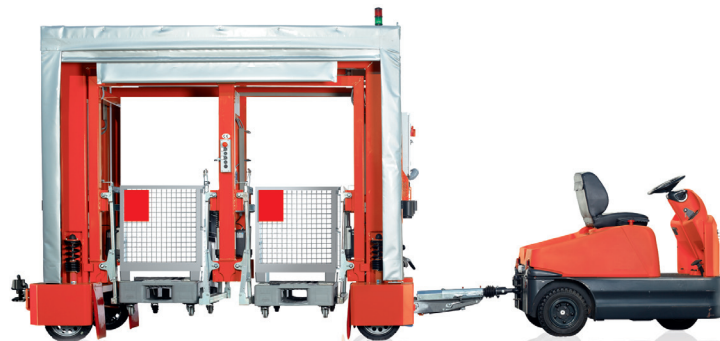

> A full range for entire success.
FEURER Full Service.

Contract packaging from a single source and just in time – FEURER Full Service offers you the entire range: from CAD packaging development with prototyping through production and picking to dispatch.

- > Not only keeping things fresh but durable, too.
The KÄNGABOX® from FEURER.

The KÄNGABOX® is a premium class thermobox. It offers safe transport and optimum insulation. And is convincing with its innovative sector solutions, ultra-stable material and aesthetic design.

> Power up your logistics.
With FEURER Milkrun Systems.

More efficiently and safely from A to B: the Rapid Supply Trailer® (RST) is an innovative milkrun system for in-company transport of oversized loads. The forklift-free system saves costs and time while leading to more safety and efficiency.
